

METU Meinig AG

ROHS

Version 2024-05-02

Dear Sir or Madam,

RoHS stands for "Restriction of Certain Hazardous Substances".

These restrictions apply solely to electrical and electronic equipment.

The METU products do not fall into this category and the RoHS directives are not applicable.

For your guidance the RoHS-certified products must have, since 2011, a CE marking as a pre-requisite.

Sincerely,

Stavros Theodossiou
Head of Marketing & Sales, Product Management
