REACH

As a metalworking company, METU Meinig AG is a manufacturer of "products" (ducts, flanges, access doors, profiles, fittings and custom-made products made of steel, stainless steel and aluminum) and is therefore a "downstream user" within the meaning of the EC regulation REACH 1907/2006 (REACH Stand 06/2023). As a downstream user, METU Meinig AG is not subject to any registration obligations under REACH.

When used as intended, the products manufactured and supplied by METU Meinig AG do not normally contain any substances that are subject to registration and pose any health risks.

We therefore certify, to the best of our knowledge, that none of our products contain Substances of Very High Concern (SVHC) above the specified limits as listed by the European Chemicals Agency (ECHA) under the provisions of Regulation (EC) No. 1907/2006 of the European Parliament and the council concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) per the ECHA 20/12/2010 and previous updates.

We strive to obtain from our suppliers the relevant information and ask them to continue monitoring in the future the status of the candidate list (SVHC, <http://echa.europa.eu/candidate-list-table>), as established under Article 33 of REACH, in order to inform product recipients if any substances or preparations of an article contain more than 0,1% by weight per article of any substances appearing in the SVHC candidate list.

This present information is based on our present state of knowledge. Assurances, warranties and/or suitability cannot be derived from this document. All previous declarations hereby lose their validity.

Sincerely,

Stavros Theodossiou
Head of Marketing & Sales, Product Management
